

TRANSPORTABLE CLASSROOMS FOR GROWING SCHOOLS

Our Lady of the Angels Primary
1 Wellgate Avenue
Rouse Hill NSW 2155

Our Lady of the Angels Parish at Rouse Hill began in May 2007 under the leadership of the parish priest, Father Warren Edwards.

Father Edwards recognised the need for the establishment of the Catholic primary school, Our Lady of the Angels, to meet the needs of the growing community of young families in Rouse Hill.

The architect designed classrooms for Kinder, Year 1 and Year 2 were manufactured and supplied by CTB Commercial. These classrooms incorporated unique insulation features to accommodate air conditioning.

Gordon Martin, Sales Consultant for CTB observes:

“Manufacturing transportable building to architect specifications was a challenging experience! But, the completed classrooms were aesthetic, open plan and flexible school spaces to facilitate the education of lower primary students.”

Team Sales, the agent for CTB, organised the transport, fit out and installation of these classrooms in late 2009. The school officially opened in February 2010 for Kindergarten-Year 4 Classes.

The involvement of CTB Commercial in the engineering and construction of these transportable classrooms was in keeping with its key strategic focus of customising buildings to fit individual school requirements.

CTB is committed to the construction of school classrooms using engineering expertise, quality components and materials to manufacture and supply buildings. Lead times were tightly controlled to ensure that the classrooms were supplied in time and to the agreed budget.
